

# **C**ommunity Action Month **Home Weatherization Assistance Program (HWAP)**

Thoughts of James B. Collier  
MYCAP Weatherization Inspector/QCI

## **What Weatherization Means to Mahoning County Residents.**

There are truly residents in need of our services that without these their living conditions would be unsafe and/or unhealthy. So, we know when talking with the customers during the initial and final inspections of their weatherization jobs, the health and safety, and air leakage problems would not be addressed if not for weatherization services. Especially that of senior residents as they live on limited incomes. Our services, such as furnace repair or replacement, hot water tanks, insulation, updating electrical panels are service that help eases the energy burdens of our community with the hopes other monthly expenses can be met. So, what is rewarding to us is the appreciation of those we help.

**(Energy Conservation Measures are determined by the inspectors based on what is required at each individual home)**

A graphic with a blue background. The top half shows a person's hands working on insulation. The text "WEATHERIZATION WORKS" is written in white. Below the text is a photo of a family (a man, a woman, and a child) smiling. To the left of the photo is text describing the program's history and impact.

**WEATHERIZATION  
WORKS**

Over its more than 40-year history, the WAP has weatherized over 7.4 millions homes, creating healthy homes and lowering energy burden.
