

Come Celebrate Community Action &

Talk Energy Efficiency with Us!!!

May 19 & 27, 2021 – 1:00 pm-3:00 pm each day

What is Energy Efficiency

Simply put, energy efficiency means using less energy to get the same job done, and in the process, cutting energy bills and reducing your energy burden. **This means putting money back into your pockets!**

- ENERGY STAR can help you find energy-efficient products and homes
- Energy efficiency helps address energy equity
- Energy efficiency saves money
- Energy efficiency protects the environment
- Smart thermostats are Wi-Fi enabled devices that control heating and cooling
- Computers can be set to automatically enter a low-power “sleep” mode

Learn about energy conservation measures such as improved insulation, air sealing, energy star rated appliances, and lighting that make your home more comfortable, and let us address your health and safety issues with the potential of receiving a new furnace and/or hot water tank.
